About The Course

What SAP EWM—and what you'll become

SAP Extended Warehouse Management (EWM) is SAP's advanced solution for managing high-volume warehouse operations and complex distribution centres. Embedded in S/4HANA, it provides granular control over inbound, outbound and internal warehouse processes, optimizing storage, picking, packing and shipping in real time.

In this course you'll learn to configure the warehouse structure, set up master data, design putaway and picking strategies, run wave and task management, and integrate EWM with MM, SD and TM. You finish able to handle real-world warehouse implementations as an EWM functional consultant.

Core Skills You'll Master

01

Warehouse Structure

Configure warehouse number, storage types, sections, bins activity areas.

02

Master Data

Productmaster, packaging specs, warehouse product groups and handling units.

03

Inbound & Outbound

Goods receipt, put away, picking, packing, shipping and loading execution.

04

Wave & Task Management

Wave creation, task interleaving, resource scheduling and optimization.

05

Integration

Connect EWM with MM, SD and TM across embedded & decentralized models.

06

Monitoring & Fiori

Warehouse analytics, KPIs, exception handling and S/4HANA Fiori apps.

Why Choose Us?

Reasons for SAP EWM.

01

Practicing Consultants

Learn from faculty who actively work on real SAP EWM implementations.

02

Free Learning Materials

Complete study resources provided at no extra cost throughout the course.

03

Lifelong LMS Access

Continued access to learning content well beyond course completion.

04

Free Resume Template

Professional, job-ready resume template to help you stand out.

05

Global Certification

Full support and guidance toward SAP global certification.

06

Live Server Access

Free access to a live S/4HANA server for hands-on EWM practice.

Get Trained, Get Certified.

Every learner is supported with expert mentorship, free resources, lifelong access and a clear path to SAP global certification and a warehouse-logistics career.

About Placements

An impeccable track record of placements & internships every year with top companies.

100%

Placement Assistance

1500+

Candidates Placed

100+

Hiring & Internship Partners

#1

Recruiters' Top Choice

1

100% Placement Assistance Policy

A committed placement assistance policy supporting every eligible learner.

2

1500+ Candidates Placed

Successfully placed more than 1,500 candidates throughout our journey.

3

3-Month Training Unlocks Placement

Students who complete the 3-month mandatory training program qualify for the placement assistance program.

4

100+ Placement & Internship Partners

A strong network of placement and internship partners hiring our students.

5

Recruiters' Top Choice

Real-time training and excellence the recruiters' preferred choice.

Why This Course

Ten things that make our SAP EWM program standout.

01

Latest Tech & Tools

Comprehensive training on the latest S/4HANA EWM features and tools.

02

Expert Instructors & Community

Access to expert instructors and a supportive community of fellow learners.

03

Course Completion Certificate

Earn cognized course completion certificate from the institute.

04

Real-Time Project

End-to-end real-time warehouse project implementation experience.

05

Flexible Learning

Flexible learning options designed to fit your schedule.

06

Global Certification

Guaranteed support toward SAP global certification.

07

Lifetime LMS Subscription

LMS subscription that stays with you for a lifetime.

08

100% Job Support

End-to-end job support from training through to placement.

09

3-Month Internship

A 3-month internship after successful course completion.

10

Free Server Access

Free access to a live S/4HANA server for hands-on practice.

Course Content

The complete, hands-on SAPEWM curriculum—module by module.

Module 1 Introduction to S/4HANA EWM

- Overview of EWM in S/4HANA
- Key differences between EWM & WM
- EWM architecture & integration (MM, SD, TM)
- Embedded vs. decentralized EWM

Module 2 EWM Organizational Structure

- Warehouse structure — warehouse number, storage types, sections
- Storage bin configuration & strategies
- Activity areas & storage type assignment
- Door determination & resource management

Module 3 Master Data in EWM

- Product master (material data)
- Packaging specifications
- Warehouse product groups
- Handling unit management

Course Content

Module 4 Inbound Processes

- Purchase order integration
- Goods receipt & putaway strategies
- Cross-docking & yard management
- Quality inspection in EWM

Module 5 Outbound Processes

- Sales order integration
- Picking strategies (FIFO, FEFO, etc.)
- Packing & shipping execution
- Loading & transportation integration

Module 6 Internal Warehouse Processes

- Stock transfers & replenishment
- Physical inventory & cycle counting
- Slotting & rearrangement

Module 7 Advanced EWM Functionalities

- Labor management (resource optimization)
- Value-added services (VAS)
- Kitting & assembly processing

Course Content

Module 8 Wave & Task Management

- Wave creation & execution
- Task interleaving & optimization
- Resource scheduling

Module 9 EWM Monitoring & Reporting

- Warehouse analytics & dashboards
- Key performance indicators (KPIs)
- Exception handling & alerts
- Warehouse monitor & alert framework

Module 10 S/4HANA-Specific EWM Features & Capstone

- Fiori apps for EWM
- New UI & simplified transactions
- Integration with TM & logistics
- Real-time end-to-end project implementation
- Global certification preparation & job support

Built for the **Real World.**

From warehouse fundamentals to wave management and a live capstone project, every module is taught hands-on so you finish job-ready and certification-ready.
