Why SAP PP Course?

01

Complete Manufacturing Cycle

Master the full plan-to-produce flow — demand, MRP, production orders, confirmation and goods movements — in one integrated flow.

02

PP Integration

PP connects seamlessly with MM, SD, QM & CO, enabling smooth end-to-end business processes across the enterprise.

03

Powerful Master Data

Learn material master, BOM, work centers, routings and production versions — the core data behind every production run.

04

MRP Live in S/4HANA

Run MRP Live vs classic MRP, MRP areas and planning runs for accurate, real-time material requirements.

05

Demand Management

Configure PIRs, consumption modes and planning strategies (Make-to-Stock, Make-to-Order) to fit any business.

06

Shop Floor Control

Hands-on with order release, capacity planning, confirmations, time tickets and goods movements on the shop floor.

07

Repetitive & Lean

REM, product cost collectors, backflush processing, Kanban and Just-in-Time production for lean manufacturing.

08

Advanced S/4HANA Features

Advanced ATP, PPDS and digital manufacturing integration — the modern edge of production planning.

09

Reporting & Analytics

Standard PP reports, KPI dashboards and production analytics with SAP Analytics Cloud to drive decisions.

10

High Career Demand

One of the most in-demand SAP modules, opening doors to well-paid PP consultant & analyst roles.

Program Details — SAP PP Course

SAP PP is among the most widely implemented SAP modules, driving how organisations plan, schedule and execute manufacturing. Doing the SAP PP consultant-level course at DroIT Solutions puts you in a strong position with industry-graded, in-demand skills. Our 3-month, job-oriented program covers the complete Production Planning process in depth — from master data and demand management to MRP, production orders, shop floor control and module integration — with practical, hands-on practice on a live SAP S/4 HANA server. Through a well-structured, instructor-led program you gain real-time project exposure and become job-ready for PP consultant and analyst roles.

Key Features

Real-Time Project Training

Learn with live, real-world scenarios for true industry exposure.

Industry-Expert Trainers

Sessions led by certified, experienced SAP professionals.

Free SAP Server Access

Practice hands-on configuration on a live SAP S/4 HANA server.

Classroom & Online

Flexible learning—attend live in class or online.

Live Projects & Practice

Hands-on assignments that build practical confidence.

100% Placement Assistance

Get Trained, Get Hired — end-to-end placement support.

Flexible Batch Timings

Weekday and weekend batches to fit your schedule.

Resume & Mock Interviews

Profile building, mock interviews and grooming sessions.

Doubt-Clearing Support

Personal attention with regular doubt-clearing sessions.

Tie-ups with 100+ Companies

A strong hiring network for direct placement opportunities.

Program Curriculum

Month 1 — Foundations & Core Master Data · hands-on SAP PP, module by module.

Module 1 Introduction to SAP PP & S/4HANA

- Overview of PP in S/4HANA & the manufacturing landscape
- Key differences between PP in ECC vs. S/4HANA
- PP integration with MM, SD, QM & CO
- Enterprise structure: Plant, Storage Location, Work Center hierarchy
- Fiori apps for Production Planning

Module 2 Master Data in PP

- Material Master (PP views: MRP 1–4, Work Scheduling)
- BOM (Bill of Materials) creation & configuration
- Work Centers & capacity data
- Routings & operation sequences
- Production Versions

Module 3 Demand Management

- Planned Independent Requirements (PIR)
- Consumption modes & consumption periods
- Demand planning strategies (Make-to-Stock, Make-to-Order)
- Strategy groups & requirement types

Module 4 MRP in S/4HANA

- MRP Live vs Classic MRP
- MRP areas & planning runs
- Exception messages handling
- Procurement proposals (planned orders, purchase requisitions)

Program Curriculum

Month 2 — Production Execution & Advanced Manufacturing.

Module 5 Production Orders

- Order creation & scheduling
- Capacity Requirements Planning (CRP)
- Order release & printing
- Confirmation & goods movements (issue & receipt)
- Order settlement & technical completion

Module 6 Shop Floor Control

- Production execution with Fiori apps
- Machine integration (MII, IoT overview)
- Time tickets & confirmations
- Performance analysis & order monitoring

Module 7 Repetitive Manufacturing

- REM vs Discrete Manufacturing
- Product cost collectors
- Backflush processing
- REM profiles & planning tables

Module 8 Kanban & JIT Production

- Kanban configuration & control cycles
- Just-in-Time production
- Lean warehouse integration
- Replenishment strategies

Program Curriculum

Month 3 — Reporting, Integration, S/4HANA Features & Real-World Scenarios.

Module 9 Integration with Other Modules

- PP-MM integration: material flow & procurement
- PP-SD integration: make-to-order scenario
- PP-QM integration: in-process inspection
- PP-CO integration: product costing & order settlement

Module 10 PP Reports & Analytics

- Standard PP reports (order info, stock/requirements)
- Production analytics with SAP Analytics Cloud
- KPI dashboards & embedded analytics
- Cockpit & monitoring tools

Module 11 S/4HANA-Specific PP Features

- Advanced ATP (aATP) in S/4HANA
- PPDS (Production Planning & Detailed Scheduling)
- Digital Manufacturing integration
- User exits & enhancements (basic overview)

Module 12 Dummy Project, Revision & Bonus Topics

- Case study: complete PP cycle for a manufacturing company
- Common industry issues & troubleshooting, revision + mock sessions
- Resume & interview preparation (SAP PP consultant)
- Bonus: Variant configuration & Batch management in PP

For Whom · Outcomes · Eligibility

For Whom Is This Course?

- ✓ Graduates in Engineering & Management
- ✓ Mechanical / Production / Industrial engineers
- ✓ Production, planning & manufacturing staff
- ✓ Supply chain & operations professionals
- ✓ Engineers & career switchers
- ✓ Working professionals upskilling in SAP

Program Outcomes

- ✓ Master PP master data: material, BOM, routing
- ✓ Configure the full plan-to-produce cycle end to end
- ✓ Run MRP Live & handle exception messages
- ✓ Manage production orders, confirmations & goods movements
- ✓ Work through PP-MM, PP-SD, PP-QM & PP-CO integration
- ✓ Become job-ready for SAP PP consultant roles

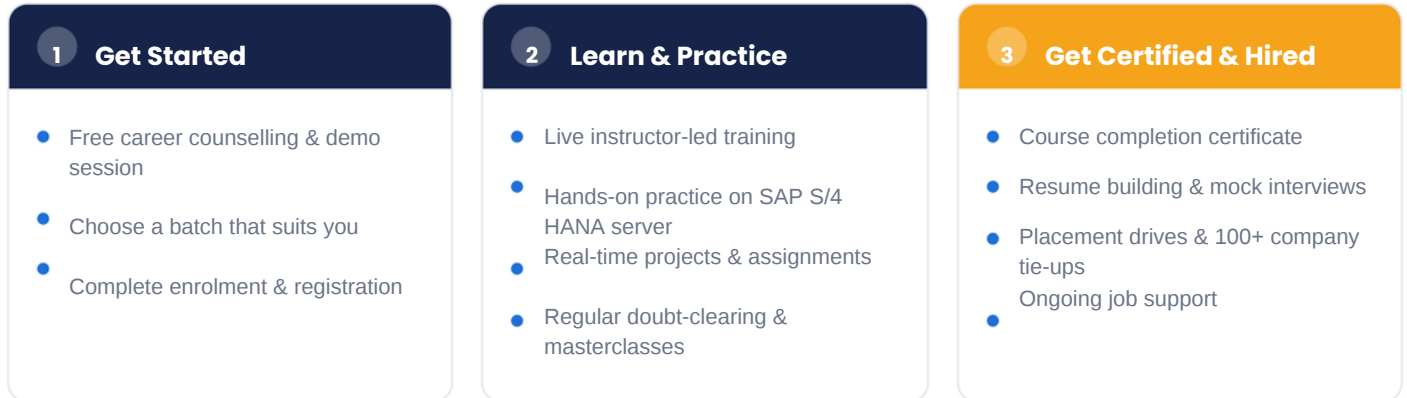

Eligibility Criteria

Any Bachelor's degree (Engineering, Management or Science). Candidates from production, manufacturing or supply chain backgrounds have an advantage, but freshers with an interest in SAP and manufacturing processes are also welcome; basic awareness of production or business processes is helpful but not mandatory.

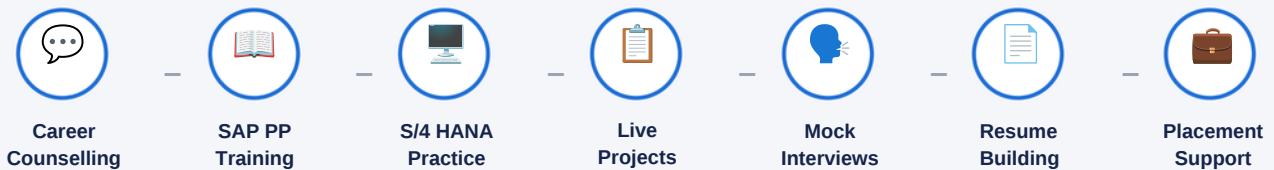

Learner Journey

A simple, guided path from enrolment to placement.

SAP PP SUCCESS PATH

Why Choose Us?

Free S/4 HANA Server

Practice & configure on a live server.

Real-Time Projects

Work on real-world scenarios.

Industry Trainers

Learn from certified SAP pros.

Flexible Batches

Weekday & weekend timings.

Training Methodology & Certification

Our Training Methodology

Live Projects

Real projects during the course build experiential, in-depth practical understanding.

Practical Pedagogy

A practice-first, hands-on approach keeps every session focused and applied.

Personal Attention

Doubt-clearing and one-to-one support ensure no learner is left behind.

Certification-Focused

Training is aligned to certification and real interview expectations.

Certification Process

1

Complete

Finish the full PP curriculum with hands-on practice.

2

Assessment

Demonstrate configuration & real-time scenario skills.

3

Certificate

Receive your completion certificate.

4

Get Hired

Get interview-ready and connected to hiring partners.

Placements & Hiring Support

Get Trained, **Get Hired.**

Leading Training & Placement Institute in Pune, committed to 100% job assistance.

KR

Khushi Raygade

16 May 2026

Had a great experience with Placement Assistance and the mentor network. The trainers are knowledgeable, supportive, and always available to solve doubts. The practical SAP training helped me gain confidence for interviews.

SAP FICO Consultant

VP

Varadraj Patil

5 May 2026

Nice guidance and excellent placement support throughout the course. The trainers explained every concept clearly with real-time examples. Special thanks to the entire team for their constant support.

SAP FICO Associate Consultant

RP

Rohit Patil

4 April 2026

One-to-one interaction with mentors made learning very easy. The SAP server access and practical sessions helped me understand real business processes. Highly recommended for SAP aspirants.

SAP FICO Consultant

SD

Snehal Deshmukh

28 March 2026

The curriculum is well structured and focused on industry requirements. Mock interviews, resume preparation, and practical assignments helped me secure my first SAP opportunity.

SAP FICO Analyst

AM

Akash More

22 March 2026

The practical approach of teaching SAP FICO helped me understand concepts much faster. The trainers were patient, supportive, and always ready to clear doubts. Highly recommended for beginners.

SAP FICO Consultant

NK

Neha Kulkarni

15 March 2026

I joined with very little knowledge of SAP, but the structured curriculum and hands-on assignments helped me build confidence. The placement guidance was extremely helpful.

SAP FICO Analyst

PJ

Pratik Joshi

10 March 2026

Excellent training quality and real-time project exposure. The faculty explained every concept with practical business scenarios, making learning easy and interesting.

SAP FICO Consultant

RP

Rutuja Pawar

6 March 2026

The SAP server access and live practice sessions were the biggest advantage of this course. The trainers focused on both technical knowledge and interview preparation.

Finance Associate

SS

Sanket Shinde

1 March 2026

One of the best SAP learning experiences I have had. The mock interviews and resume-building sessions helped me prepare for the recruitment process professionally.

SAP Support Consultant

PP

Priyanka Patil

25 Feb 2026

The trainers have strong industry knowledge and explain topics in a very simple manner. The learning environment is professional and motivating.
